

Nicholas Fernie's Oil and Gas Skills

Well Site Operations

- Well site geologist for onshore and offshore operations
 - Mudlogging
 - Coring
 - Wireline Logging
 - Reporting

Geomechanics

- Development of MEMs
- Offset Well Reviews
- Frac Reviews

Static Modelling

- Static to dynamic modelling workflows
- Petrel Workflow builds for automation
- Uncertainty Analysis using Petrel tools
- Seismic depth conversions
- Regional modelling
- Local (field level) modelling
- Opportunity Generation

Sedimentology

- Full hole Core reviews
- Depositional Analogue selection
- Application to modelling and subsurface uncertainty analysis
- Deposition controlled compartmentalization reviews
- Sequence Stratigraphy

Production Geology

- Compartmentalization analysis
 - Fault driven
 - Stratigraphic
- Reservoir Complexity Analysis
 - Optimise recovery factor
 - Regional field screening

Well Planning

- Tight Gas ‘factory style’ programs of 20+ wells per campaign
 - Including fracture stimulation
- Horizontal Well Planning
 - Oil Type
 - Gas Type
- Conventional Well planning
- Overseen 100+ onshore wells

Varied depositional environment/play type experience

- Shallow Marine
- Fractured Granite
- Tight Fluvial Reservoirs
- Conventional Fluvial Reservoirs
- Shale
